Diskusi tentang kesimpulan (insight) dari video yang telah ditonton. Pada sesi ini membuktikan bahwa serumit dan sebesar apapun datanya, membuat narasi dari sebuah data akan mempermudah memahami data.

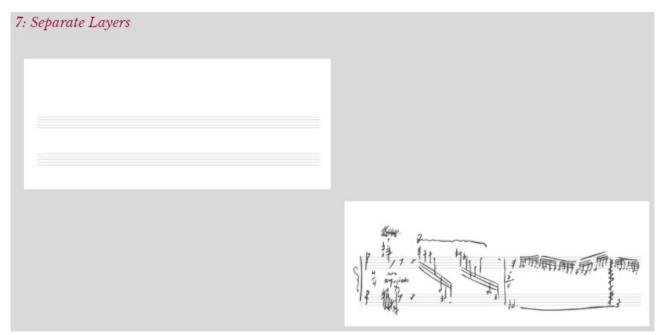

6: Utilize Micro/Macro

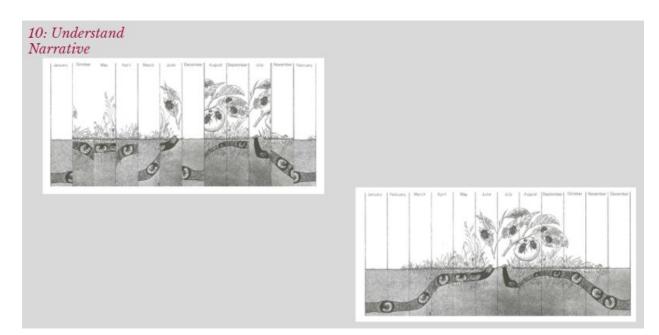

- 1. Change over time
- 2. Drill Down
- 3. Zoom Out
- 4. Contrast
- 5. Intersections
- 6. Factors
- 7. Outliers

1. Change over time

Change Over Time

What it does: Uses a chronology to illustrate a trend.

Discussions it starts: Why did this happen, or why does it keep happening? What can we do prevent or make this happen?

Example:

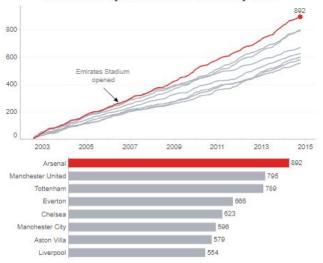

https://public.tableau.com/de-de/gallery/ars enal-injury-crisis

Arsenal's Injury Crisis

Players have suffered nearly 900 injuries in 12 years and Arsene Wenger has admitted he does not understand why *Study only includes teams that have been in the EPL every year since the 2002-03 season through 12 October 2014

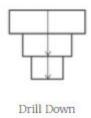

Arsenal have been	Season after season	Meanwhile, Arsenal's	Arsenal have had	Perhaps the pitch at	Arsenal have had 4	1
accumulating injuries	Arsenal dominate the	rivals suffer much	440 hamstring, knee,	Emirates Stadium is	players with 10 or	
at a staggering rate	injury table	fewer injuries	foot & ankle injuries	to blame	more injuries	

Cumulative injuries suffered since July 2002

16

2. Drill Down

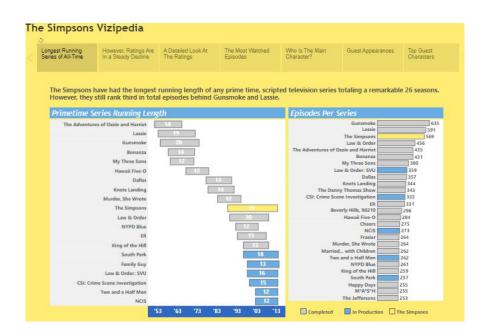

What it does: Sets context so that your audience better understands what's going on in a particular category.

Discussions it starts: Why is this person, place or thing different? How does the performance of this person, place, or thing compare?

Example:

https://public.tableau.com/de-de/gallery/vis ualizing-simpsons

3. Zoom Out

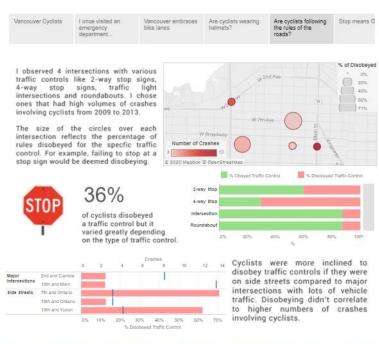

Zoom Out

What it does: Describes how something your audience cares about relates to the bigger picture.

Discussion it starts: How does something you care about compare to the bigger picture? What effect does one area have on the bigger picture?

Example:

https://public.tableau.com/de-de/gallery/vancouver-cyclists

4. Contrast

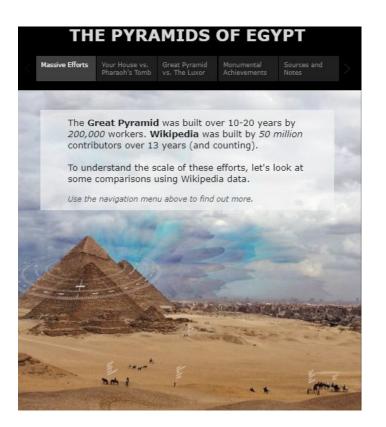

Contrast

What it does: Shows how two or more subjects differ.

Discussions it starts: Why are these items different? How can we make A perform like B? Which area should we focus on and which area is doing fine?

Example:

https://public.tableau.com/de-de/gallery/pyramids-egypt

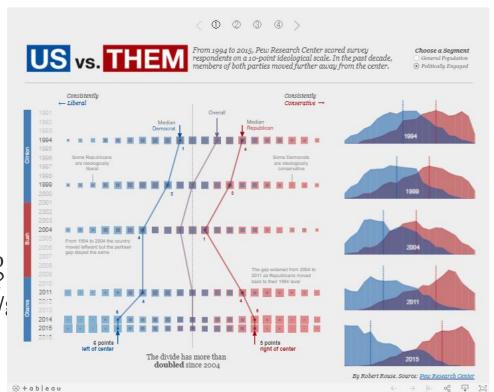

5. Intersections

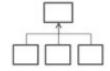

What it does: Highlights important shifts when one category overtakes another.

Discussions it starts: What causes these shifts? Are these shifts good or bad? How do these shifts affect other aspects of our plan?

Example: https://public.tableau.com/en-us/allery/political-polarization-us

6. Factors

Factors

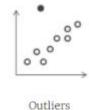

What it does: Explains a subject by dividing it into types or categories.

Discussions it starts: Is there a particular category we should focus on more? How much do these items affect the metric we care about? **Example**:

https://public.tableau.com/profile/steph.baranya #!/vizhome/PlanetEarth____/Injustafewstepsyo uwillhopefullygetinvolved

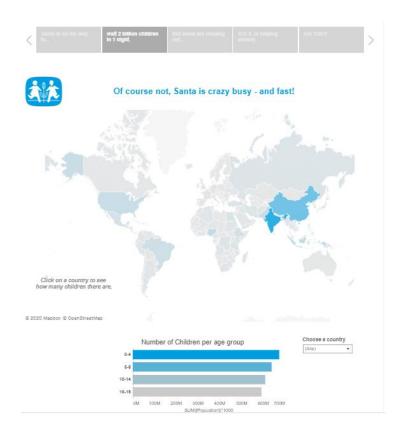

7. Outliers

What it does: Shows anomalies or where things are exceptionally different.

Discussions it starts: Why is this item different? **Example**:https://public.tableau.com/profile/step h.baranya#!/vizhome/AdultVersion_final/SOSChi ldrensVillagesX-MasCampaignSantaGetInvolved Donate
